The use of the mobile online services from We Connect is enabled via an integrated Internet connection. The associated data costs in Europe are borne by Volkswagen AG as part of the network coverage with the exception of the "Streaming & Internet" services. Data packages can be purchased from the external mobile communication partner "Cubic Telecom" to use the "Streaming & Internet" services and the Wi-Fi hotspot. These data packages can be used in numerous European countries. Information about the prices and support countries is available at www.vw.cubictelcom.com. Alternatively, web radio, and media streaming can be used via a mobile device (such as a smartphone) which is capable of serving as a mobile Wi-Fi hotspot. In this case, the services are only available in conjunction with an existing mobile phone contract between you and your mobile phone provider or with a contract concluded separately for this purpose and only where coverage is available. Depending on your mobile phone tariff, receiving data from the Internet may incur additional charges, particularly if you are using the device abroad (e.g. roaming charges). A smartphone with a suitable iOS or Android operating system is required to use the free We Connect app, along with a SIM card with data option with an existing mobile phone contract or one concluded separately for this purpose between you and your mobile network provider. The availability of the individual services from We Connect and We Connect Plus can vary from country to country. The services are available for the agreed duration of the contract and may be subject to changes to the content during the contract period or be cancelled. Further information is available at www.vwn.de/mod and from your Volkswagen Commercial Vehicles partner. Please contact your mobile network provider for information about the mobile network tariff conditions.
